

Model No. C.M.IDE-SATA-02/F

The C.M.IDE-SATA-02/F is an IDE-to-SATA 2.5" HDD bay adaptor serving as a solution for the overstock of IDE hard drives, because the production of IDE hard drives is about to cease and the SATA drive is growing fast on the market. The C.M.IDE-SATA-02/F is designed for IT professionals, SOHO users, industrial PCs, factory equipment, hospital equipment and professional repair technicians. For old and industrial systems that do not support SATA hard drives, the C.M.IDE-SATA-02/F can "convert" a 2.5" SATA hard drive into a 3.5" IDE hard drive.

Features

- Single IDE-to-SATA chip
- No driver needed
- Same size as general 3.5" hard drives on the market
- LED indicator to display read/write status
- 3.5" mechanism to facilitate internal installation.
- Easy to install and use
- Same connections as ordinary 3.5" IDE hard drives

Specifications

- IDE to SATA single chip
- Supports single 2.5" SATA hard drive
- High-efficiency IDE transfer (ATA133MB/s)
- LED indicator to display read/write status
- Supports Master/Slave/Cable Select settings
- Same mechanism as 3.5" hard drives
- Dimensions: 131mm(D) X 101.6mm(W) X 23mm(H)
