The PCM-225/2 model consist of a PC-104 plus (16/32 bit) interface module with two built-in PCMCIA card slots. The PC-104 plus interface module can be stacked with other PC/104 modules, mounted on a custom carrier board or stacked directly on a CPU card. Two PCMCIA slots are built into the interface board. The PCM-225/2 is ideal for user who require two PCMCIA interface slots where easy accessibility to the PCMCIA slots is not required. The PCMCIA slots on the PCM-225/2 provides full support for all Type I, Type II, and Type III PCMCIA memory, I/O and ATA hard disk cards.
